DISSERTATION ABSTRACT

My dissertation presents an account of transgender equality as an element, requirement, and condition of gender equality, which I defend on the grounds that it resolves long-standing conceptual and methodological problems that continue to frustrate feminist theory and politics today. To do justice to trans people's lived material realities, I argue that a theory of transgender equality in particular and gender equality more broadly needs to take seriously *both* the gender (the social ontology) *and* the equality (the political and legal philosophy) of gender equality, not just one or the other. The upshot is that transgender equality not just poses difficult challenges to, but more constructively sheds precious light on, our understanding of the meaning and requirements of gender equality.
